DeskAPP

sistematica

USER MANUAL

# SISTEMATICA APPS

for all Smart & Global devices

## WebApp

Better from a computer using the link [www.sistematicaweb.it](http://www.sistematicaweb.it), to:

- identify anomalies in REAL TIME
- register EVENTS on our Cloud (*GLOBAL devices cannot register WHEN, only WHAT*)
- “on the road” assistance through GPS localization and remote monitoring
- online diagnostics, also preventive
- creation of a new configuration (*not for SMART devices*)

## SmartApp

**SMART** devices can:

- update the device's software
- transmit parameters, warnings and diagnostics (REALTIME)
- consult clock/calendar Event log
- consult the documentation of the connected device
- configure device settings (light)
- use Virtual Emergency Handheld
- change radio Frequency (868/2.4)

## SmartApp

**GLOBAL** devices can:

- update the device's software
- transmit parameters, warnings and diagnostics (REALTIME)
- consult event list
- consult the documentation of the connected device
- use Virtual Emergency Handheld

These features are granted in the APP for ASSISTANCE service purposes only.

# WEBTOOLS

## SMART LINE

Sistematica's **WebTools** are:

- The **Web Portal**, accessed through the URL [sistematicaweb.it](http://sistematicaweb.it)
- The related **WebApp**  to be downloaded from the relative store

We recommend the use of our **WebTools** to Customers with large distribution networks. In this way they may offer back-office Assistance services to their users.

## INDEX SMART

<b>ACCOUNT CREATION</b>	4	15	DOCUMENTS

EVENTLOG	13	19	ADD USER
REALTIME	14	20	<b>TRANSFER</b>

# ACCOUNT CREATION

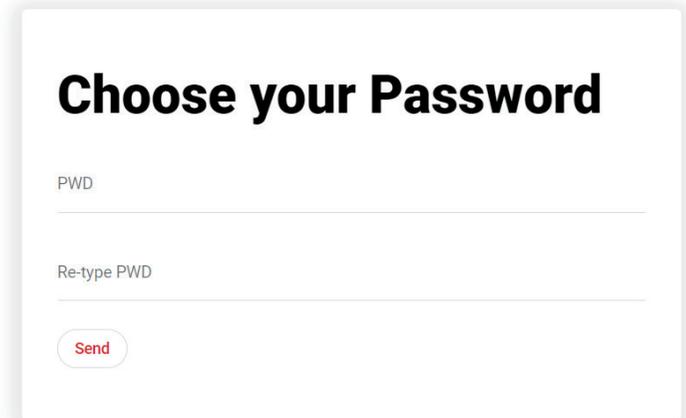

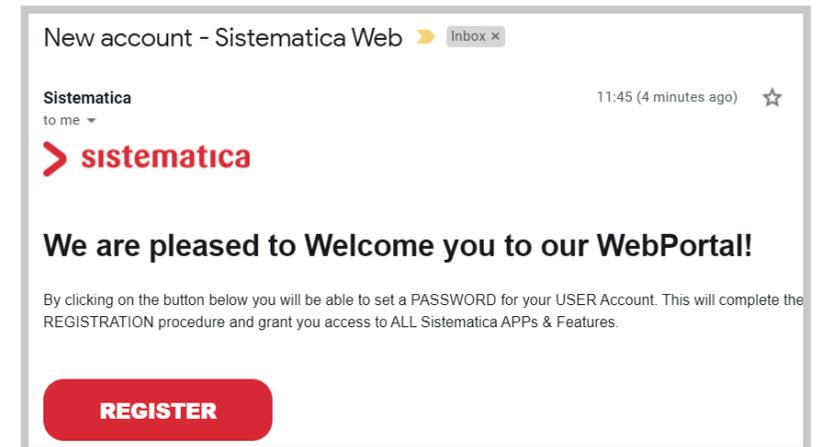

## Requirements

- smartphone/tablet/PC
- internet connection
- email address

- 1** Access to Sitematica's services begins through **EMAIL INVITE**. When purchasing a product, you will be asked for:
  - ▶ the Company name and/or 'nickname';
  - ▶ an active email address (we recommend using the corporate one for back-office management of the associated accounts).The invite should arrive within 48h (also check SPAM inbox) with a link to activate your Account.
- 2** Click on the red **REGISTER** button at the bottom of the email and follow instructions to create a password (minimum 5 characters).
- 3** Type your password and repeat it in the second field. Confirm by pressing **SEND** key. Registration is complete and your Account is active!

Write down the credentials and keep them handy together with the **QR Code** of the device:

**User:** email with which you registered;  
**Pwd:** your password.

# APP INSTALLATION

## Requirements

- smartphone/tablet
- internet connection
- Google account (Gmail) or Apple ID associated with the device

- 1 From smartphone or tablet, search for Google Play  or Apple Store .

Or click on the links:

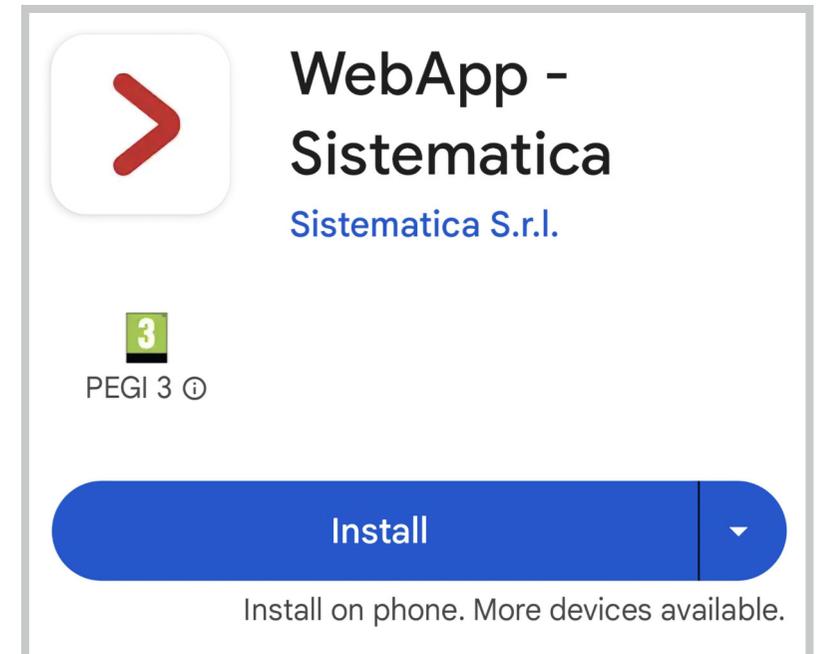

- 2 Search by typing “WebApp - Sistematica” and select the icon  or scan the related QRcodes with the camera

Select  (iOS will ask for further confirmation via Face ID, Touch ID or PWD).

- 3 Click on “Install” and wait for the App to finish loading.  
The SmartApp icon will automatically create itself among your saved apps and will be accessible using the credentials generated during **account creation**.

# LOGIN / LOGOUT

## Requirements

- smartphone/tablet/PC
- **WebAPP** installed (if using a smartphone/tablet)
- registration credentials
- internet connection

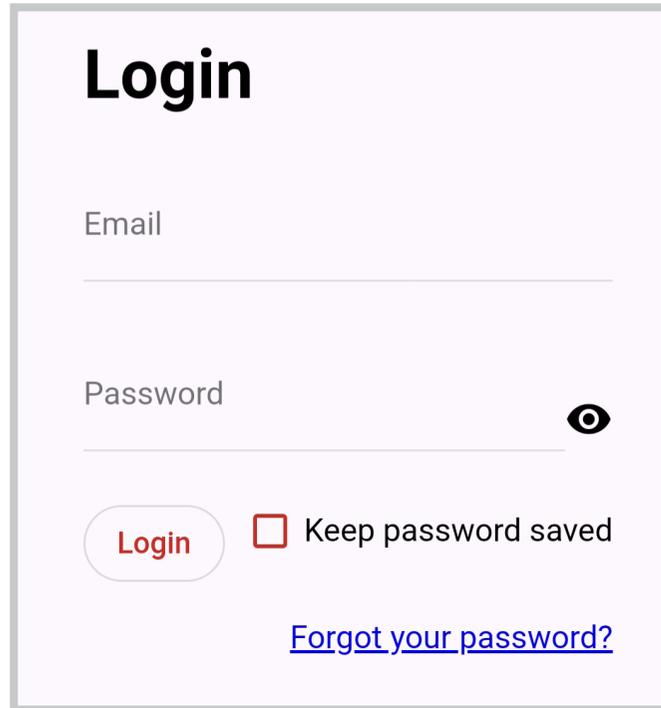

- 1 Every time the App is selected , or when the [sistematicaweb.it](http://sistematicaweb.it) URL is accessed, the LOGIN page will open requesting:

**USER:** email to which the registration invite was sent;

**PWD:** personal password.

- 2 Once the two fields have been filled in, select **Login** to start. If the data is correct you will be redirected to the WebPortal, otherwise a message will report the error.

- 3 A page asking to choose the device's LINE will appear.

**Login**

Email

Password 

Keep password saved

[Forgot your password?](#)

→ Pressing this icon displays the password.

→ By selecting the box, the credentials are stored (if you do not log out).

→ Password recovery procedure

Logout

The **LOGOUT** button is located top right of every page/screen of the Web Portal with the name of the Company displayed or on the bottom of the menu in the WebApp.

## ADD USER

to create a new user.

**Search:**  
 allows free search of a text.

**Email:**  
 address of the invited or registered user.

**Note:** only the list of DIRECT users (1st level) is displayed.

Email	Company	Confirmed	History
info@sistematica.it	Sistematica	✓	🕒
info@customer.com	Customer	✓	🕒
info@sample.com	Sample	✗	🕒

**History:** transfer history list.

**Confirmed:**  
 displays the registration status.  
 ✓ Registered  
 ✗ Invitation sent, pending registration (can be deleted if in this phase)

Selecting a user (the row) you can view permissions and, if enabled, modify them:

Child	
Create Brother	✓
Create Child	<input type="checkbox"/>
Use Gps	✓
Transfer	<input type="checkbox"/>

The **CLASS** (Brother or Child) and the selected permissions are indicated with ✓ while those that can be selected show the box

**Brother** = user of the same company or equivalent (therefore owns and sees the Devices, Software and Direct Users);

**Child** = usually a customer of the user-creator.  
 A child can only SEE devices/SW that have been TRANSFERRED to him (p20).

# USERS > ADD USER

To create a new profile/user, click on **Add User** and fill in:

**1** The **Email** to which you wish to send the Registration invite (the use of a company email is suggested)

**!** **(Optional field)**  
**Company:** This field can be filled in only in the case of CHILD class (allows the recognition of devices and users through the company name).

**2** The second field allows you to decide the type of **CLASS** (Brother/Child) which determines the way in which the user will find the products accredited.

**3** The bar indicates "typical" groups with predefined permissions. The ⊕ allows you to create a custom group.

**Permissions** (selectable via the boxes):

- ✓ **Create Brother:** create BROTHER user
- ✓ **Create Child:** create CHILD user
- ✓ **Use GPS:** enable GPS usage
- ✓ **Transfer:** transfer devices or software
- ✓ **Update SW Version:** Software update
- ✓ **Emergency:** enable Virtual Emergency Handheld
- ✓ **Config:** enable system configuration
- ✓ **Change Frequency:** enable frequency change
- ✓ **Set Pin Code:** enable Pin code
- ✓ **Change Permissions:** change permissions enabled
- ✓ **RealTime:** allows you to view RealTime events (yes/no)
- ✓ **TAG:** allows you to view associated TAGs (yes/no)
- ✓ **EventLog:** allows you to view the EventLog (yes/no)

# TRANSFER

## Requirements

- smartphone / tablet / PC
- LOGIN to **WebAPP** (if using a smartphone/tablet) or our WebPortal [sistematicaweb.it](http://sistematicaweb.it)
- internet connection
- SmartLine device and/or software

To transfer the management of a product:

- 1 Click on the type of product to be transferred (Device - Software).
- 2 Choose from the list (more than one product at a time can be selected).
- 3 Select the user to transfer to (drop-down menu for search).

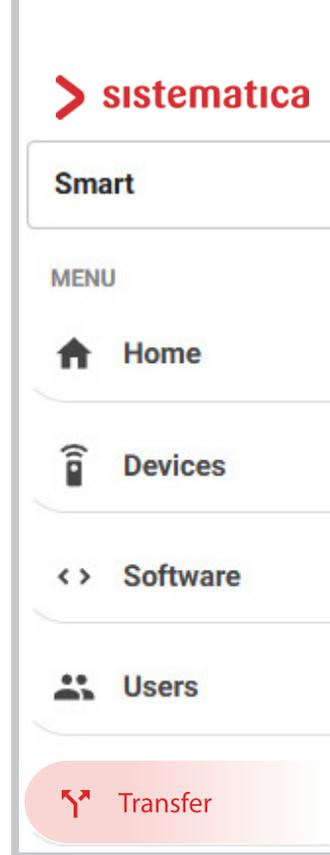

The screenshot shows a web interface for transferring products. At the top, it asks "What do you want to transfer?" with three buttons: "Devices" (highlighted in red), "Software", and "History". Below this, it says "Choose the devices you want to transfer." and shows a list with the word "Devices" in a text box. Underneath, it asks "Choose the next owner of all the selected devices." and shows a "Recipient" text box. At the bottom, there is a red "Transfer devices" button. Arrows from the numbered list on the left point to these three main sections.

**!**  
*The device must be transferred to 'child' (ie.client) when sold/assigned or he will not see it*

**History:** List of transfer history with possibility to cancel the operation

Once the 3 fields have been completed, click the **Transfer** button. A message will confirm the outcome.

- ! **Transfer** is only allowed by the 'creator' user if enabled, toward one of his 'created' 1st level users (ie. child/client).
- ! The transferred Product remains listed to the 'creator' user, who can consult but no longer transfer. The Software however, is always transferable.
- ! When transferring, the system automatically transfers the original software of the Device as well, which may NOT be present in the product at the time of the transfer, and all its **standard SW**.
- ! Through **History** it is possible to cancel a Transfer of a product only if the recipient has not yet retransferred it in turn.

address of the invited or registered user.

**Note:** only the list of DIRECT users (1st level) is displayed.

Email	Company	Confirmed	History
info@sistematica.it	Sistematica	✓	🕒
info@customer.com	Customer	✓	🕒
info@sample.com	Sample	✗	🕒

**History:** transfer history list.

### Confirmed:

displays the registration status.

- ✓ Registered
- ✗ Invitation sent, pending registration (can be deleted if in this phase)

Selecting a user (the row) you can view permissions and, if enabled, modify them:

Child	
Create Brother	✓
Create Child	☐
Use Gps	✓
Transfer	☐

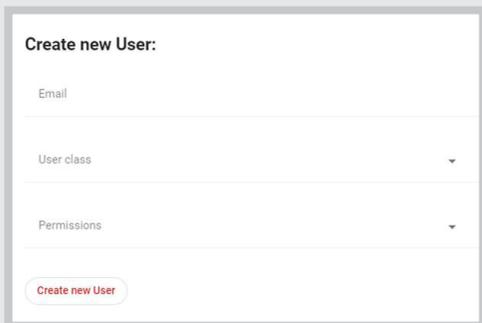

The **CLASS** (Brother or Child) and the selected permissions are indicated with ✓ while those that can be selected show the box ☐

**Brother** = user of the same company or equivalent (therefore owns and sees the Devices, Software and Direct Users);

**Child** = usually a customer of the user-creator.  
A child can only SEE devices/SW that have been TRANSFERRED to him (p34).

# USERS > ADD USER

To create a new profile/user, click on **Add User** and fill in:

**Create new User:**

1 Email

2 User class

3 Permissions

Create new User

**1** The **Email** to which you wish to send the Registration invite (the use of a company email is suggested)

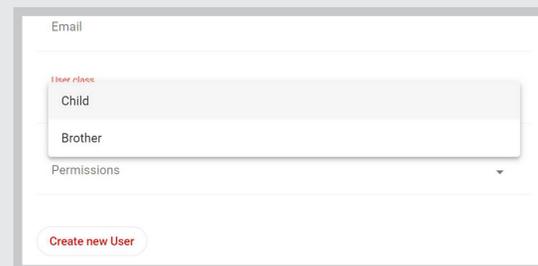

**!** **(Optional field)**  
**Company:** This field can be filled in only in the case of CHILD class (allows the recognition of devices and users through the company name).

**2** The second field allows you to decide the type of **CLASS** (Brother/Child) which determines the way in which the user will find the products accredited.

**3** The bar indicates "typical" groups with predefined permissions. The ⊕ allows you to create a custom group.

**Permissions** (selectable via the boxes):

- ✓ **Create Brother:** create BROTHER user
- ✓ **Create Child:** create CHILD user
- ✓ **Use GPS:** enable GPS usage
- ✓ **Transfer:** transfer devices or software
- ✓ **Update SW Version:** Software update
- ✓ **Emergency:** enable Virtual Emergency Handheld
- ✓ **Set Pin Code:** enable Pin code
- ✓ **Change Permissions:** change permissions enabled
- ✓ **RealTime:** allows you to view RealTime events (yes/no)
- ✓ **EventLog:** allows you to view the Event LIST (yes/no)
- ✓ **Configurations:** enables GLOBAL configurator

# TRANSFER

## Requirements

- smartphone / tablet / PC
- LOGIN to **WebAPP** (if using a smartphone/tablet) or our WebPortal [sistematicaweb.it](http://sistematicaweb.it)
- internet connection
- Global device and/or software

To transfer the management of a product:

- 1 Click on the type of product to be transferred (Device - Software - Credits).
- 2 Choose from the list (more than one product at a time can be selected).
- 3 Select the user to transfer to (drop-down menu for search).

### Transfer

What do you want to transfer?

Serialnumbers
Firmwares
Credits

Choose the number of credits to transfer

Available Credits: 0

Credits

Choose the next owner of the credits

Next owner

Transfer Credits

**History:** List of transfer history with possibility to cancel the operation

Once the 3 fields have been completed, click the **Transfer** button. A message will confirm the outcome.

- ↔️ **Transfer**
- ⚙️ Configurations

- ! **Transfer** is only allowed by the 'creator' user if enabled, toward one of his 'created' 1st level users (ie. child/client).
- ! The transferred Product remains listed to the 'creator' user, who can consult but no longer transfer. The Software however, is always transferable.
- ! When transferring, the system automatically transfers the original software of the Device as well, which may NOT be present in the product at the time of the transfer, and all its **standard SW**.
- ! Through **History** it is possible to cancel a Transfer of a product only if the recipient has not yet retransferred it in turn.

# CONFIGURATIONS > SILVER/GOLD

TOKENS / CREDITS are provided by Sitematica or can be transferred through your local supplier ON DEMAND.

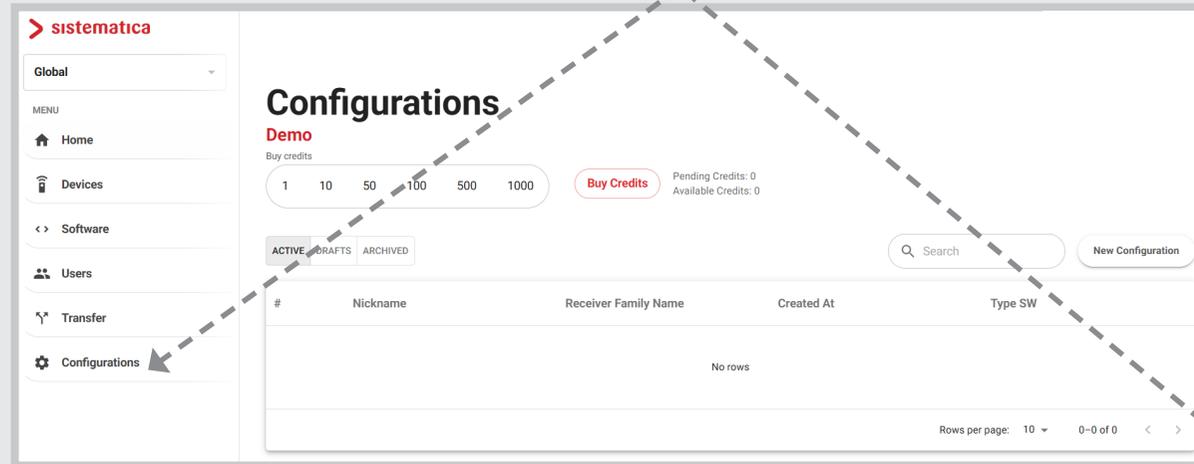

## TOKEN:

UN-BLOCKS the USER ACCOUNT and grants access to the CONFIGURATIONS page.

## CREDIT:

Transforms a GLOBAL device into SILVER/GOLD membership, enabling the BASIC or FULL parameter set-up inside the configurator.

To access the CONFIGURATIONS page, you need to acquire a TOKEN to un-block your ACCOUNT.

M/L: Maintained/Latched on any handheld key  
 Time-Out: the handheld inactivity time can be adjusted  
 MO: MasterOutput present/absent on any handheld key  
 EO: EmergencyOutput present/absent on START key  
 Inhibition: keys may be blocked from being used  
 DataSheet: creation of documentation relative to the new configuration  
 Online Verification & consistency approval through PopUp confirmation

Page Change: additional 3 pages expanding functions from the handheld  
 Simultaneity: prevents the contemporaneity of different outputs  
 Interlock: between different outputs  
 Grouping: definition of outputs managed by one key  
 Safety Point: only the CLASSIC version; present/absent on any handheld key  
 Input Reader: decide if to trade 1 OUT as DIGITAL INPUT  
 CANbus: allows configuration of CAN features

# CONFIGURATIONS > BASIC/FULL

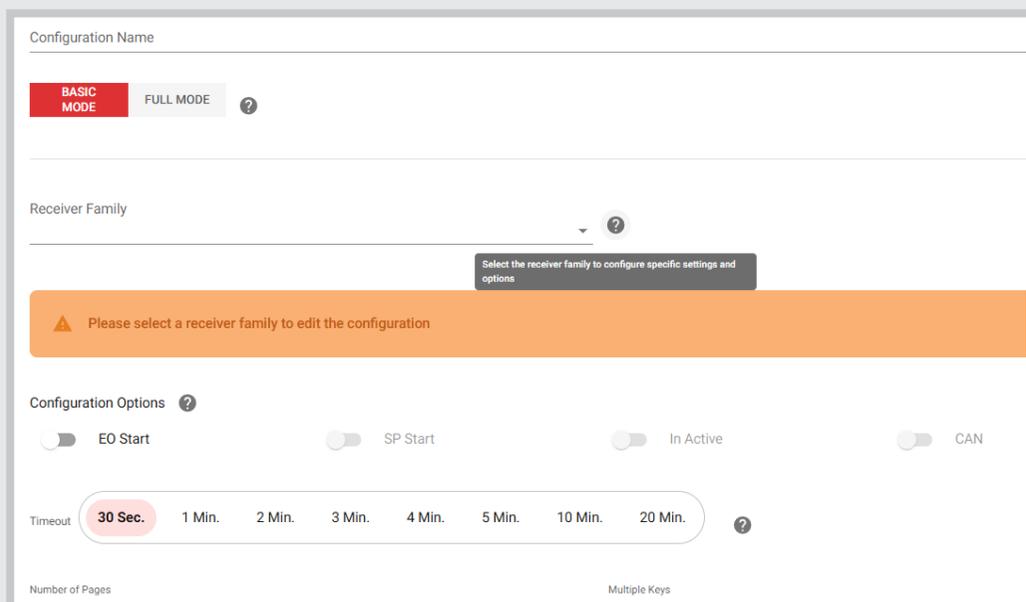

Once abilitated to enter SILVER mode **on the device**, you can decide up to what LEVEL you would like to re-configure the parameters of the NATIVE SW.

- Each ACCOUNT can use a TOKEN to access the CONFIGURATOR (once and forever).
- To create a NEW CONFIGURATION you may use the credits on the ACCOUNT
- When creating the NEW CONFIGURATION you must decide in which mode you are working (BASIC/FULL)
- To install the NEW CONFIG on a device you will need to:
  - un-block **the device** into SILVER mode (using credits) if it is a BASIC CONFIG
  - up-grade **the device** into GOLD mode (using credits) if it is a FULL CONFIG

The receiver determines the amount of OUTPUTS or KEYS/PAGES you will see

in BLACK/RED what can be modified, in GREY if not permitted by status or device
